PLEDGE

I pledge to be as green as can be, so I can live a healthier, happier life and help saving the environment at the same time.

I will motivate others to preserve and plant trees for saving our earth for the coming generations. I'm planting because I feel we need to give back to Mother Earth in gratitude for all she does for us.

I believe it is our responsibility to care for that which the Lord has made - one another, as well as all of creation. God blessed us with the glory of his creation; in return we need to bless it with our care and compassion. I pledge to not cause acid rain or any environment problems and I will recycle.

I pledge to make my actions nourishing and life-giving, living as environmentally-friendly as possible. Dear Mother Earth, I am aware of the current grievances. I will do everything in my power to correct them. I will not cease until you are bestowed the honor you deserve for your service to humanity and to all life.

I will encourage my friends to be green. I love the trees and I don't want to see them destroyed. If there is one thing I'll do it is to keep our home safe.

I will keep our earth safe and healthy.

Hence, this pledge.
